VISUAL CONTEXT FOR YOUR PRO

### THE PROBLEM

Most landscaping projects stall before they start. The core issue: **homeowners struggle to communicate their vision**, and contractors struggle to quote accurately without one. The result is wasted consultations, misaligned estimates, and projects that never get off the ground.

Research from the landscaping industry consistently shows that **projects with visual alignment between homeowner and contractor close faster and come in closer to budget**. Scuber creates that alignment automatically - before the first call is made.

### THE PROCESS

## From Photo to Professional Concept in 3 Steps

1

## Upload a photo of your yard

Open Scuber.pro on any smartphone and snap a photo of your front yard - or upload one from your camera roll. No special equipment, no sketching, no lengthy forms. The AI works from your actual outdoor space, not generic templates.

💡 Works best with a clear daytime photo showing the full yard

2

## Receive AI landscaping concepts for your yard

Within minutes, Scuber generates multiple realistic landscaping design concepts based on *your specific yard*. Browse styles ranging from modern xeriscape and lush garden to cottage, tropical, and formal - and select the vision that excites you most.

💡 You can generate multiple concepts and compare side by side

3

## Connect with a local pro who already sees your vision

Your chosen concept gets shared with vetted local landscaping professionals on the Scuber platform. Every pro receives your yard photo and AI concept upfront - so they arrive for consultations already aligned with your vision, ready to quote accurately, and ready to build.

💡 Pros on Scuber are actively looking for homeowners with visual briefs

*"Every homeowner deserves to easily envision their home's potential - and connect with the right expert to bring it to life. That's exactly what we're building."*

**RENATA TURKASPA - CEO & FOUNDER, SCUBER.PRO**

### COMMON QUESTIONS

## Frequently Asked Questions

Is Scuber.pro free for homeowners?

Yes. Scuber.pro is completely free for homeowners to use - upload your photo, get concepts, and connect with pros at no cost.

---

### What kind of AI concepts does Scuber generate?

Scuber generates realistic before-and-after landscaping concepts based on your actual uploaded yard photo - not stock imagery. Available styles include modern xeriscape, cottage garden, tropical, formal, and more.

---

### Do I need to download an app?

No. Scuber.pro is a mobile-first web app that runs directly in your phone's browser. Any smartphone with a camera works.

---

### How does my pro receive my concept?

When a pro claims your project on Scuber, they automatically receive both your original yard photo and the AI concept you selected. This shared visual brief replaces lengthy back-and-forth and produces faster, more accurate quotes.

---

### Is this available in my area?

Scuber.pro is available to homeowners across the United States. Landscaping professionals are onboarding nationwide.
